LETTER OF RECOMMENDATION

Ref: The business activity carried out by the company GEORGH ENGINEERING Ltd Sofia city

DEAR SIRs,

Together with GEORGH ENGINEERING Ltd, being the performer of Project **C-02** *Fortifications of the dam lake of Belmeken - principal and buttress dam* which was a stage of erecting the second stage of Pumped-storage Hydro Power Plant *CHAYRA*, financed by the Bank for Reconstruction and Development (IBRD) in 1997, we realized the erection of the envisaged in the project elements for controlling and measuring system of the site including:

- Principal dam:
 - overbuilding 32 items of piezometers and radioisotope boreholes along the dam bit;
 - fixing 15 deep bench marks;
 - Building and assembling a system consisting of three accelographs mutually connected in a set, together with GPS antenna;
- Buttress dam:
 - Assembly of 5 items of piezometers along the downstream batter of the newly built embankment dam having the volume of 5900 m².

Being the executor of the site, the company GEORGH ENGINEERING Ltd for the extremely short constructions periods at the altitude of the crest level of 1925 m successfully completed the envisaged Construction Assembly Works at the site and filled in 6500 m³, laid 26000 m³ of concrete, assembled 87000 kg of fittings and 104 tight stretching anchors along the dam bit of the dam lake *Belmeken*, the envisaged electric works for the purposes of lighting of the dam and asphalt-concrete works as well as draining ditches over 900 m and the adjacent equipment to them.

We recommend the company GEORGH ENGINEERING Ltd as a correct partner whose abilities allows it to work professionally and complete hydro-technical sites different in volume and complexity within due terms.

Yours faithfully:

MANAGER:

/Eng. B. Tsvetanov/
